ANTOINE D'ALBIOUSSE'S UPHOLSTERY FABRICS

Antoine d'Albiousse Editions is a French family-owned company, which was created from the acquisition of the traditional Destombes company and has developed it further. Recognised by the greatest professionals in decoration, the company offers exceptional fabrics.

The fabrics are displayed in a world that reflects its creator, amidst antique objects, in a showroom flat in the heart of Paris, a stone's throw from the Opera.

Antoine d'Albiousse, the director and founder of the company, is particularly keen to combine traditional and ancestral know-how with today's manufacturing methods. This is the DNA of the house.

Why are our fabrics unique ?

Antoine d'Albiousse has a particular talent for mixing contemporary creations, artisanal know-how and modern techniques. His collections embody French know-how that is both elegant and timeless. They are a guarantee of a job well done thanks to artisanal manufacturing and colouring processes combined with today's techniques to obtain avant-garde fabrics.

Its original approach to decorative textiles is based on non-negotiable values: quality, excellence, beauty, rarity, uniqueness, respect for ancestral knowledge.

Collections of revisited classics, casual, smart chic. Fabrics that are sophisticated in their simplicity. Antoine d'Albiousse is passionate about his fabrics, they vibrate, they have an incomparable feel and fall!

This specific know-how enables him to obtain fabrics with an authentic patinated antique look for some, and elegant and refined for others.

Antoine has spent his entire career in the greatest houses such as Pierre Frey, Lelièvre, Canovas... He is therefore recognised by his peers and by professionals as a true expert in his field. For the past 10 years, he has laid the foundations of a brand that symbolises French chic.

He is very demanding in terms of quality and wants to find the hand of the fabrics of yesteryear on his fabrics. He prefers to concentrate on the finishing of his collections rather than on the quantities produced, to obtain perfect results.

THE HISTORY OF EMBOSSING : WHERE, WHEN, HOW

Embossing is the process of finishing fabric to change its appearance. A fabric is said to be embossed when it has a slightly raised design on its surface. The design or pattern will be more or less accentuated depending on the choice of the designer.

It all began in the 5th century BC, when printing patterns on fabric was a luxury reserved for the wealthy. Embossing appeared in France at the end of the 17th century.

This ancient process has been adapted over time to suit the times and is now highly sought after by the most fashionable professionals such as designers, interior architects and decorators.

The technique: which process ?

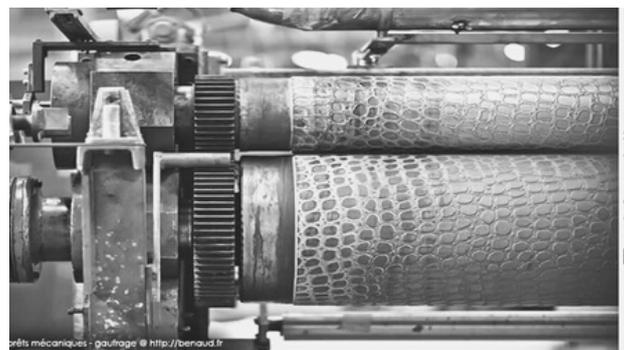

The hot pressing of the fabric between two cylinders, one of which is engraved with a particular pattern, produces a precise design. Depending on the thickness and composition of the fabric, the design is either raised on velvet or shiny on finer fabrics such as canvas. This process is based on two printing cylinders. The male and female cylinder. The "male" is made of a positive material while the "female" cylinder uses negative magnesium..

It is the joining of the cylinders that creates the desired embossing. The right choice of fabric, in terms of quality or weight, must be made to obtain the desired effect. Indeed, the same design on two different materials will not have the same effect.

The embossing technique has evolved over time but remains based on the same principle of printing the fabric with one or two cylinders.

HOW AND WHY SHOULD EMBOSSING BE INTEGRATED INTO YOUR PROJECTS ?

King Arthur in Naturel : Embossing Vauban

Leading interior designers and decorators are very fond of them to create unique projects! We work with them on the choice of fabrics, colours and embossing designs. Do not hesitate to contact us to discuss your projects!

Antoine d'Albiousse is an undeniable fan of embossing which allows him to :

- **Shape** unique projects and make them sublime.
- **Recreate** historical settings
- **Create** a link between the past and the present, the classic and the contemporary
- **Revisit** the classics
- **Create** ruptures
- **To ennoble** raw materials that he particularly likes.

But also because embossing is the perfect alliance between **know-how** and **tradition** and corresponds perfectly to the values of the House.

The embossing technique gives you the possibility to **personalise** your projects. With over **350 designs** available in our guide to combine with our vast collection of fabrics, the possibilities are endless.

Which embossing methods in our house ?

Antoine d'Albiousse offers **tailor-made** embossing, using **traditional** techniques developed over 200 years ago and applied by the **best craftsmen** in France.

Our velvets (Velours de Fiacre, Touch Me, Washed Velvet, Zibeline) lend themselves particularly well to embossing. It is also very interesting on unexpected materials such as linen (King Arthur, Drap de Flandres), cotton (Toile de Cocher or Bivouac), Tweed (Caviar) and many others...

This is the originality of Antoine d'Albiousse: transposing this technique usually used for velvet to other materials, on all its plains.

Thus, it offers different fabrics, which cannot be found anywhere else, whose materials are sublimated. Our finishing touches are not only visible to the naked eye, but also sensitive to the touch. Embossing gives your fabrics an extra touch of soul, creating a link with the past.

In the following pages, you will find practical information as well as a stylistic and alphabetical classification (13 in total) to guide you in your choice of designs (more than 350) to be combined endlessly with our materials and colours.

INSTRUCTIONS FOR USE AND PRACTICAL INFORMATION

The Antoine d'Albiousse team is at your disposal to help you choose the finishing of our fabrics. We will emboss the fabric you have chosen from our collections at your request.

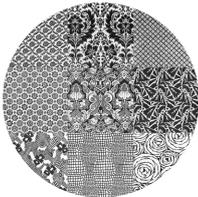

Emboss your fabrics in 5 steps

1.

The choice of material and colour

2.

Select from our 364 drawings the one that suits you: the dimensions of each drawing are indicated. Please check the width of the design and the dimensions of the fitting.

3.

Validate any technical constraints with our teams:

1. Ensure that the usable width of the fabric to be embossed is compatible with the width of the cylinder.
2. And check that the width of the design is compatible with the desired use.

4.

Ask our team for a quote

5.

Confirm your order and receive your order within 3-4 weeks for available fabric.

GOOD TO KNOW

- Only embossing on synthetic fibres can be considered permanent. Embossing on natural fibres (cotton, linen, hemp, etc.) is more delicate and may be altered by contact with liquids or high humidity.
- For velvets, the straightening of the pile with use is a normal phenomenon that cannot be considered a defect.
- The embossing technique can be combined with other treatments (e.g. flame retardant or water repellent).

They trust us to sublimate the interiors of their customers

Interior designers, decorators, luxury palaces and grand hotels, luxury homes, royal houses, private residences and castles... use our embossing services to cover seats, make curtains or wall hangings.
